HANDLING AND LIFTING SYSTEMS

Boat hoists

MAIN FEATURES

- Engineering and manufacturing process completely internalised
- Machinery compliant to 2006/42/CE guidelines and to FEM / UNI EN standards
- Customized dimensions according to customer's needs
- Soundproofed diesel engine compliant to current regulations
- Anti-corrosion painting compliant to C5m cycle
- Radio remote control with LCD colour display
- Partial/total weight reading system
- Load balancing 60% / 40%
- Independent and electronically synchronized winches
- Double proportional lifting speed unloaded / loaded
- Lifting belts with safety factor 7:1
- Double proportional motion speed unloaded / loaded
- Industrial tyres, air-inflated or equipped with specific filling
- Pipes and fittings in galvanized painted steel
- Hydraulic oil filtering
- Electrical supply by 24 VCC battery
- Remote assistance in real time by M2M system

STEERING

Front-wheels steering

Rear-wheels steering

All steering

Diagonal march

Crab steering

OPTIONAL

- U-shaped upper-beam for sailboats rigging
- Variable track by hydraulic expansion system
- Full-electric version equipped with lithium battery with guaranteed autonomy according to predicted duty cycles
- Driver cabin
- Auxiliary jib crane
- Windmeter
- Workspace lighting with LED lights
- Trunnion pin system for increased structure resistance on uneven surfaces
- "Dynamic Steering Control" system via motorized turntables for increased manoeuvrability
- Pipes and fittings in stainless steel
